Getting Started!

Here are some quick steps that will get you started with your hosting plan with NetWebSolutions®.

You can also find your username and password, IP Address, and links to important sections on our web site in your "Welcome Letter" which was sent by email to your primary email address when you signed up with NetWebSolutions®.

If you need to ask a question about your hosting account, simply click the "Contact Us" icon in your control panel, or send an email to us [her](#)

Your Domain Name

If you have registered a domain name with NetWebSolutions®, it will propagate (transfer over the Internet)

If you already have a domain name, and have registered it with another hosting provider, you will need to

You will need to contact your Domain Registrar (Network Solutions, Register.com, TuCows, etc.) and po

- You can do this by changing your name servers to point to:
 - o Primary: NS1.NETWEBSOLUTIONS.COM
 - o Secondary: NS2.NETWEBSOLUTIONS.COM
- Propagation will take 24-72 hours, until you can use your domain name with NetWebSolutions®.

Your Control Panel

All NetWebSolutions® accounts have a customized control panel, which allow you to build a rofessiona

You can access your control panel by going to:

<http://yourdomain.com/menu>

If your domain has recently been transferred and it is in the process of propagating you can access your

You can change your password by simply:

1. Login to your domain manager by going to your ipaddress/menu and entering the username and password
2. Click on the "Change Password" icon
3. Your password must be at least 8 characters long
4. When changing your password to the control panel, it will not change the password to your MySQL database
5. If you forget your FrontPage extension passwords, you can uninstall and reinstall the extensions

[Back to Selection Menu](#)

Replace the Under Construction Page

This can simply be done by changing your home page name to index.html not index.htm

Note: If you are using Microsoft or FrontPage, you do not need to choose the www folder

If your page has one of the following filenames, you can delete the existing index.html and your page will be displayed

- index.htm
- welcome.html
- welcome.cgi
- index.html
- index.shtml
- index.cgi
- index.php
- index.phtml
- default.htm

Simply delete the index.html file and anything in the above list will automatically come up.

If you see the "forbidden" error when viewing your web site, this is because you have deleted the
